## PROFESSIONAL SUMMARY

---

Motivated and detail-oriented Quality Assurance enthusiast with a strong passion for software quality and hands-on experience in manual testing, functional and regression testing, defect management, API testing, and test automation using Java and Selenium WebDriver. Skilled in SDLC and software testing best practices, with an enthusiastic mindset to contribute to real-world QA projects while continuously learning and improving in a fast-paced environment.

## TECHNICAL SKILLS

---

**Testing & QA:** Manual Testing, Functional Testing, Regression Testing, Exploratory Testing, Usability Testing, Defect Management, Test Case Design & Execution

**Test Automation:** Selenium WebDriver, TestNG, Maven, Page Object Model, Data-Driven Testing

**API Testing:** Postman (API Student Expert Certified), RESTful APIs

**Performance Testing:** Apache JMeter

**Programming:** Java (primary), JavaScript, Python, PHP, HTML5, CSS3

**Methodologies:** SDLC, Agile/Scrum, Defect Lifecycle Management

**Tools & Technologies:** Git, React.js, Node.js, MySQL, MongoDB, ExtentReports

## CORE COMPETENCIES

---

- Test Case Design, Maintenance & Execution
- Functional, Regression & Exploratory Testing
- Defect Identification, Documentation & Tracking
- Cross-Functional Collaboration
- API Testing with Postman
- SDLC & Agile/Scrum Methodologies
- Automation Framework Development
- Proactive Self-Learning & Adaptability

## KEY PROJECTS

---

**Smart Garment Production Tracking System (SGPTOS) | MERN Stack, RFID, IoT, Manual Testing** 2025

- **Manual Testing & Test Case Design:** Designed and executed detailed test cases covering functional and regression testing of key system modules including production tracking and analytics dashboard.
- **API Testing:** Conducted API validation using Postman, verifying request/response integrity and identifying defects across service endpoints.
- **Performance Testing:** Performed load and performance testing using Apache JMeter; documented findings and collaborated with the development team for resolution.
- **Defect Management:** Identified, clearly documented, and tracked bugs in collaboration with cross-functional team members to ensure timely resolution.
- 🌐 [github.com/SasinduV0/SGPTOS-FinalProject.git](https://github.com/SasinduV0/SGPTOS-FinalProject.git)

**SwagLabs Automation Testing Project | Selenium WebDriver, TestNG, Java, Page Object Model** 2025

- **Automation Framework:** Developed end-to-end UI automation test suite for the SwagLabs demo application using Java (JDK 21), Selenium WebDriver, and TestNG — covering functional and regression scenarios.
- **Test Design:** Applied Page Object Model architecture for scalable and maintainable test scripts; implemented data-driven testing to maximise coverage with minimal script duplication.
- **Reporting:** Integrated ExtentReports and logging for clear, stakeholder-ready test execution reports suitable for CI pipelines.
- 🌐 [github.com/dilmi1108/SwagLabsAutomationProject.git](https://github.com/dilmi1108/SwagLabsAutomationProject.git)

## POS System Automation Testing Framework | *Selenium WebDriver, TestNG, Java, Page Object Model* 2025

- **Framework Development:** Building a comprehensive automation testing framework for a POS system, identifying suitable scenarios for automation and implementing structured test scripts under a Page Object Model.
- **Automation Learning:** Developing practical skills in test script development, automated report generation, and data-driven scenarios — directly aligned with industry automation practices.
-  [github.com/dilmi1108/FrameWork.git](https://github.com/dilmi1108/FrameWork.git)

## Java Library Management System | *Java, Console Application, Manual Testing* 2025

- Developed Java-based console application for managing library operations including books, magazines, users, and borrowing.
- Created comprehensive manual test cases covering edge cases and error scenarios.
-  [github.com/dilmi1108/LibraryManagementSystem.git](https://github.com/dilmi1108/LibraryManagementSystem.git)

## Web-Based Conference Management System | *HTML5, CSS3, JavaScript* 2024

- Developed a web application for conference management with user registration, session scheduling, and form validation — gaining exposure to usability and functional testing considerations during development.
-  [github.com/dilmi1108/WebBasedConferenceDayManagementSystem.git](https://github.com/dilmi1108/WebBasedConferenceDayManagementSystem.git)

## EDUCATION

---

### Institute of Technology, University of Moratuwa 2023 – Present

*National Diploma in Technology, IT*

- Advanced studies in software development, **testing methodologies**, database management, and quality assurance. Currently in final year with a group project focused on full-stack development and QA.

### Sevanagala National College 2020

*G.C.E A/L – Physical Science Stream*

- Subjects: Physics, Chemistry, and Combined Mathematics.

## EXPERIENCE & LEADERSHIP

---

### Sri Lanka Ports Authority (SLPA) 2026 – Present

*Software Developer Intern*

- **Tech Stack:** Angular, Spring Boot, MySQL Workbench.
- Led the development of the **EDDS (Electronic Document Digitization System)**, managing task allocation and contributing across requirement gathering, development, and testing phases.
- Handled database schema design and query optimization for enterprise level port operations.

## PROFESSIONAL CERTIFICATIONS

---

- **Postman API Student Expert Certification** – Hands-on certified API testing skills using Postman
- **Introduction to Software Quality Assurance** (Open UOM) – Foundational QA concepts and testing methodologies
- **Defect Management, QA Reporting: Metrics and KPIs** (Udemy) – Defect lifecycle, reporting, and quality metrics
- **Python Programming Online Learning Programme** (Open UOM)

## EXTRACURRICULAR ACTIVITIES

---

- Active Member – University Computer Society & Media Club, University of Moratuwa
- Active Member – Nature Team, University of Moratuwa
